Excerpt: . health is a much debated point, but from an economic point of view, soft water is much preferable, and it is said that in Glasgow, since the soft water supply from Loch Katrine was introduced, a saving of over 30,000 in soap has been effected per annum. Hard water also causes lime deposits in boilers, kettles, and hot-water pipes; it is unpleasant for domestic use as it produces roughness of the skin. Dyspepsia, gravel and stone in the bladder, and swellings of the glands have also been attributed to its use. The late Sir Douglas Galton suggested that 10 deg. of hardness would satisfy the general requirements of a town supply. Dr. Clark's process for removing temporary hardness consists in the addition of lime, by which means the bicarbonate of lime in the water is reduced to a carbonate, which latter is precipitated....
