Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Excerpt from *Experiencing Technical Work: A Comparison of Male and Female Engineers* The study on which this paper is based was done in collaboration with Dr. Dalia Etzion from the Faculty of Management, Graduate School of Business Administration, Tel Aviv University. It was supported by funds from the Sloan School of Management and the Association of Mit Alumnae (Amita). At its inception we had the help, also, of Dr. Anna-Maria Garden. And without the able assistance of Susan Zarzeczny and the Mit Undergraduate Research Opportunities Program which funded, in part, her involvement, there would be no paper. We are grateful also to the Boston Section of the Society of Women Engineers and to Amita for supporting this project and for helping to identify the target population, and to the many women and men who took the time to respond to our questionnaire. An earlier version of parts of this paper was presented at The 4th IEEE Careers Conference on Developing Careers: Issues for Engineers and Employers, Cambridge Ma: October 4, 1985.
