RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 26 pages. OCLC Number: (OCoLC)47670618 Subject: Atmospheric ozone -- United States. Excerpt: . . . esignated ozone non-attainment zone. Reformulated gasoline is the most important issue for people in southeastern Wisconsin at this time, from my opinion and just from the constituent response that we have been receiving, and it has been an issue like this for a good month and a half. Small business owners and families in southeastern Wisconsin want to know why they pay more for gasoline than any other region in the country, and at the height of this crisis was the fact that Wisconsin consumers were paying an average of 40 cents a gallon more for the price of gasoline than the national average. This memorandum summarized, as did the CRS report, that rapidly increasing gas prices in the Milwaukee area are a supply problem--high consumer demand with low inventories. And the Department of Energy memo goes on to be more specific: The Milwaukee and Chicago supply situation are further affected by: (a) an RFG formulation specific to the area that is more difficult to produce; (b) higher regional demand; (c) high regional refinery utilization rates; (d) limited alternative supply sources; (e) limited transportation links; and (f)...
