

Mathematical Questions with Their Solutions, from the Educational Times Volume 1

Filesize: 4.31 MB

Reviews

This ebook will be worth acquiring. It is actually written in basic phrases instead of hard to understand. It is extremely difficult to leave it before concluding, once you begin to read the book.
(Trystan Yundt)

MATHEMATICAL QUESTIONS WITH THEIR SOLUTIONS, FROM THE EDUCATIONAL TIMES VOLUME 1

To read **Mathematical Questions with Their Solutions, from the Educational Times Volume 1** eBook, please refer to the web link below and download the file or have accessibility to other information which might be in conjunction with MATHEMATICAL QUESTIONS WITH THEIR SOLUTIONS, FROM THE EDUCATIONAL TIMES VOLUME 1 ebook.

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 32 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1866 edition. Excerpt: . . . we have the equation of the conic of five pointic intersection at the point (ft). The result in its reduced form may be obtained directly without much difficulty, but it is obtained most easily as follows: let the function on the left-hand of the foregoing equation be represented by a, b, c, f, g, h ($r, j, ,$) then writing $x: y: z = 1: 8: 83$, we have $(a, b, c, f, g, h) (1, 8, 83)$ 1958. (Proposed by J. Gbippiths, M. A.) -Let P denote a point in the plane of a given triangle ABC ; a, b, c the feet of the perpendiculars drawn from P upon the sides BC, CA, AB . Then if the triangle 07 is homologous with the given one ABC , the locus of P is a cubic which passes through (1) the angular points of the triangle; (2) the centres of the inscribed and escribed circles; (3) the point of intersection of the three perpendiculars; (4) the centre, O , of the circumscribing circle; (5) the points L, M, N , where the radii AO, BO, CO produced meet this circle again. Moreover, if V denote the inverse of P with respect to the sides of the given triangle, show that P also lies on the cubic-locus in question. I. Solution by J. Dale; and others. Let r, y, z be the coordinates of P , the equations of Aa, Bb, Cc will be $0 = -\cos A \cos B$ and these...
